Experience

Frontend Web Developer Intern, Bike Bear Sdn Bhd – Kelana Jaya, Selangor   January 2024 – April 2024

- Conducted thorough quality checks and debugging for all assigned projects by using every available web and phone browsers, ensuring high standards of functionality and performance.
- Developed mobile-responsive websites to ensure optimal user experience across devices, both iOS and Android.
- **E-Commerce Website: Amee Philips,** https://ameephilips.com/
  - Collaborated with a team comprising direct supervisor, project manager, and designer.
  - Delivered all inner pages on time, adhering to a schedule of completing two inner pages per day over two weeks.
  - Implemented Lenis.js for a smooth scrolling effect, enhancing user experience and is now used by the team.
  - Researched and integrated Isotope.js to create a custom filter function, improving site navigation for their products.

- **Landing Page for AMWAY: Nutrilite,** https://www.amway.my/category-landing-page/nutrilite
  - Independently developed the landing page and inner pages alongside a project manager and designer.
  - Successfully completed the project within a tight three-week deadline, delivering the desktop version in two weeks and the mobile-responsive version in the final week.
  - Integrated Lottie.js for JSON animations, ensuring smooth performance and fast loading times.
  - Resolved CORS and SVG restrictions by leveraging Lottiefiles.

- **OSchool Website,** https://www.oschool.com.sg/
  - Worked alongside a senior developer, project manager, and designer to revamp the OSchool website.
  - Solely responsible for developing all inner pages except the homepage, consistently completing three pages every two days.
  - Received client commendation for writing clean, easily understandable code, enabling non-coders to update content independently with ease.

- **Infront Consulting Asia Website,** https://infrontconsulting.asia/
  - Collaborated with a senior developer, project manager, and designer to develop the corporate website.
  - Responsible for all inner pages except the homepage, maintaining a pace of completing three pages every two days.
  - Resolved issues with Google's search index by providing guidance on using Google Search Console, ensuring the new website appears correctly in search results.
